### SUMMARY

Dedicated Full Stack Developer with a solid foundation in software engineering principles, honed through hands-on experience in real-time projects. Possessing a robust understanding of both front-end and back-end technologies, I am committed to developing efficient and scalable web solutions. Eager to leverage my technical skills in Python, Java, PHP, and database management to contribute to innovative projects and enhance user experiences.

### WORK EXPERIENCE

#### Full Stack Developer

I&T Labs August 2024-Present

- Developed and maintained web applications, working seamlessly across front-end and back-end technologies.
- Collaborated in an Agile team environment to create innovative software solutions tailored to client needs.
- Employed best practices in coding and conducted code reviews to ensure the quality of the codebase.

#### Junior Developer Intern

Envision Webier Technologies March 2024-July 2024

- Assisted in building responsive web applications using PHP and WordPress, enhancing user engagement.
- Participated in full software development lifecycle, including planning, coding, testing, and deployment.

#### Software Engineer Intern

Kodnest Technologies June 2023-Feb 2024

- Engaged in real-time projects that involved both front-end and back-end development.
- Gained valuable industry experience in software engineering practices and project management.

### PROJECTS

#### Drug Recommendation System Using Machine Learning

#### Developed a Real Time Websites named Jashka, WeKconnects

- Real-Time Project Collaborations.
- Participated in designing and developing various web applications that involved comprehensive database integration and responsive design.
